Welcome To Karim Studio

Are We Right For You?

We don't have a type. Why? Because successful projects occur when people understand each other and share a common set of values. We believe in our skill set and aren't afraid to take on any project. Over the years, we've worked with people from fashion, food, knowledge, technology, trade, and sport, backgrounds. But that's just the past. We'd love it if you challenged us with something new.

We are focused on

Thinking..

Before we start thinking, we ensure we've fully understood your needs and are in the right frame of mind.

Innovation..

Innovation is, well, innovation. We design your project and amaze your audience, We got the eye of an artist.

Creativity..

All good creativity design processes need to continually loop back and forth between evaluation and production.

About Our Creative Agency

who are we

Starting its activities on Feb 2009, Karim Studio's vast scale of service offerings ensures its strong persistence on the internet.

Our Team

Here at **Karim Studio** we make it a priority to choose well educated, experienced, passionate and diverse team members, to ensure an outcome of high-level quality for every project we undertake.

We make sure every team player is well equipped with the best and latest in the professional fields they work in. When our team come to work, we make sure they feel as if they are part of the company and not just staff employed.

We achieve this by conducting meetings to discuss objectives, aims and goals, in search of ways to better serve our clients.

What we do

Web development

The cooking phase, all the ingredients are ready and waiting for the mix, from building a neat architecture database, non-technical friendly CMS to bringing the designs to life. Great developers just don't read the requirements they understand and challenge it.

Web design

You need more than a beautiful responsive static website using HTML and CSS. You need a complete online strategy, designed to convert. Client-focused, customer-centric, creating website solutions that deliver tangible business results, Karim Studio web developers helps brands the ever-changing digital landscape.

E-Commerce

Everything You Need To Start Selling Online Today. Fulfillment Integration. Unlimited 24/7 Support. Mobile Commerce Ready. Accept Credit Cards. SEO Optimized. Secure Shopping Cart. Highlights: Karim Studio Experts Available, 24/7 Support Available.

UI & UX

Then comes the user centered phase, it all starts with a solution for the user and should end by a convenient application to this user. It is a well known fact that user experience can make or break any product.

What we do

Mobile application

Then comes the user centered phase, it all starts with a solution for the user and should end by a convenient application to this user. It is a well known fact that user experience can make or break any product.

Graphic design

We work with guidelines and mess with content; designing all the marketing and advertising material and we just don't stop there! We love when our designs come to life, Textures, Materials, and all that.

Photography

Our in-house photography services team made up of professional photographers can add value to your website with high-resolution team photos, corporate event photography and product photography.

Brand identity design

Creating branding items and advertising material all the way to printing and production implementation.

What we do

Logo design

Developing the sketches to a complete concept with icon, suggested typography and color palette and developing the identity manual to include all the dos and don'ts, logo placement and brand messages

Motion graphics

Moving images are, without a doubt, the most captivating form of communication. Why? Because motion creates emotion. We excel at transforming these unfixed elements into engaging brand stories; and, more importantly, are constantly pushing their boundaries (by morphing online video and user interaction wherever possible). What's more, we know how to leverage these viewing experiences and make your digital presence the epicenter of its industry.

Digital Art & Digital Painting

We provides digital art services for everyone and for every need. We design to the client's specifications and expectations, with quick turnaround.

Social media Marketing

Optimize your social media strategy with Facebook, Twitter, Instagram, Pinterest, LinkedIn and more.
